REINFORCING OUR GLOBAL EXPANSION

The rising demand of Graphenstone products made us settle three production plants in three different continents.

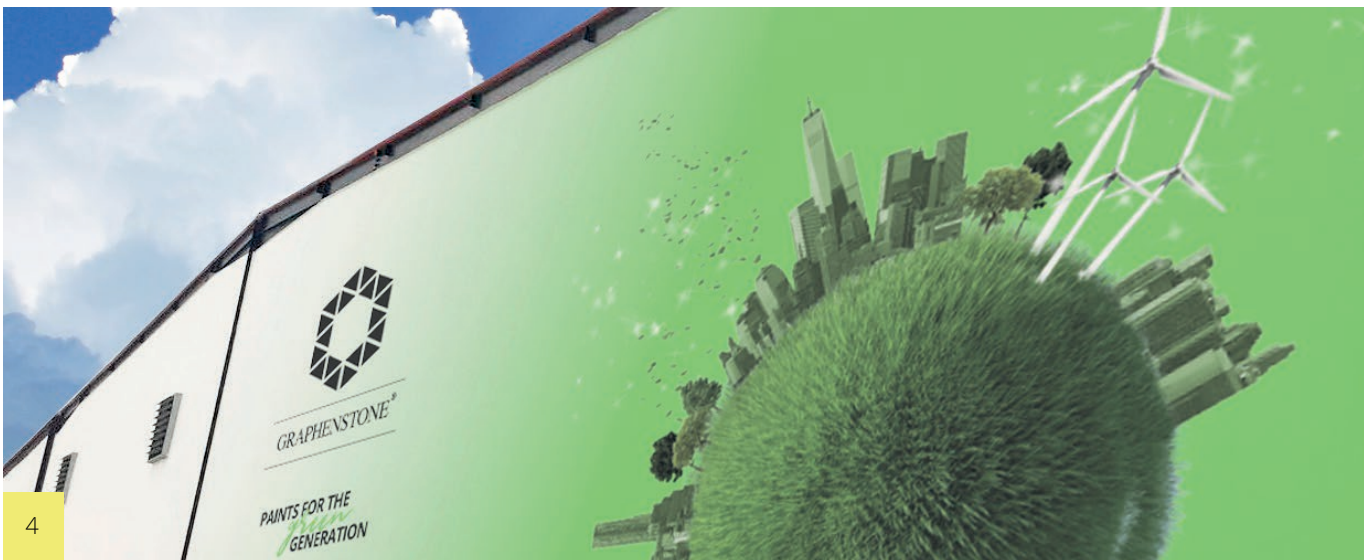

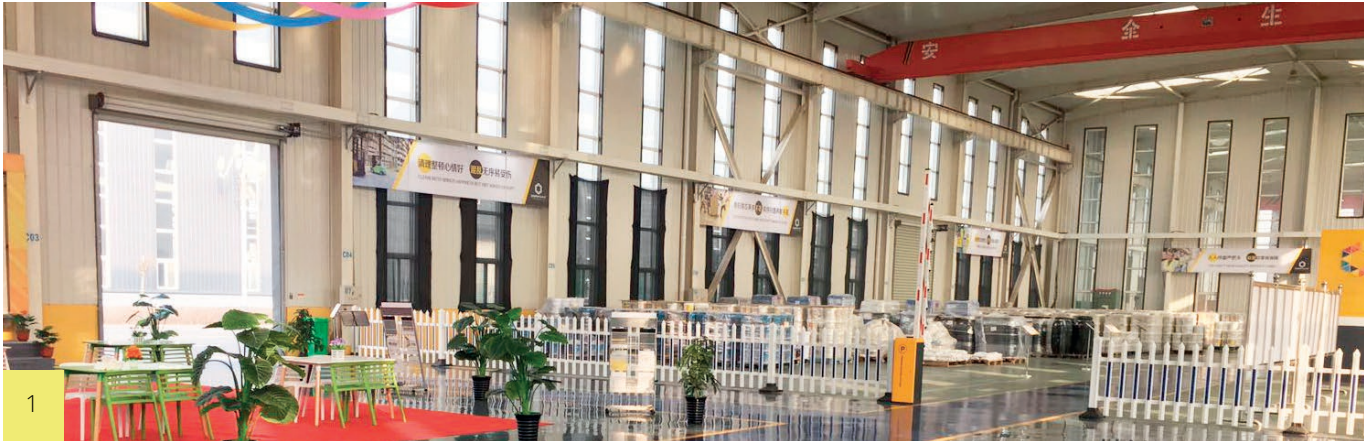

Graphenstone Spain Headquarters. Exposition & Showroom.

Graphenstone is expanding and currently we have factories in Spain, Panama and China. The headquarters are placed at El Viso del Alcor (Spain). Moreover, in 2016 we invested 2,5 million Euros to upgrade our factory in order to quadruple the output of 2 million kilograms a month. Now we meet the rising demand in the whole Europe.

In addition, we recently opened our new showroom to the professionals in the field. A meeting place where every client receive a fully personalised attention and they can see and touch the Graphenstone samples displayed. Furthermore, we have two other industrial plants strategically located in Panama and China. The first one provides the market in North America, Central America and South America with Graphenstone products; and the second one is devoted to cover the China demand.
